

Electronic Device

独自のノウハウを活かした 高付加価値のデバイス開発

弊社の電子機器分野への進出は、金属とプラスチック両分野でこれまで培ってきた技術を応用し、それらの特性を活かすべくアッセンブリー(組立、組込)分野まで業態を拡大してまいりました。

コンピュータ関連機器・医療・健康・美容機器にも進出し、なかでも電気、電子技術のノウハウを加味したOEM(相手先ブランド)製品の設計製造は弊社の最も得意とする分野となっております。

弊社の複合力の向上は、ユーザーの満足度をさらに高めることにもつながり、お取引先様からも絶大な信頼を得ております。

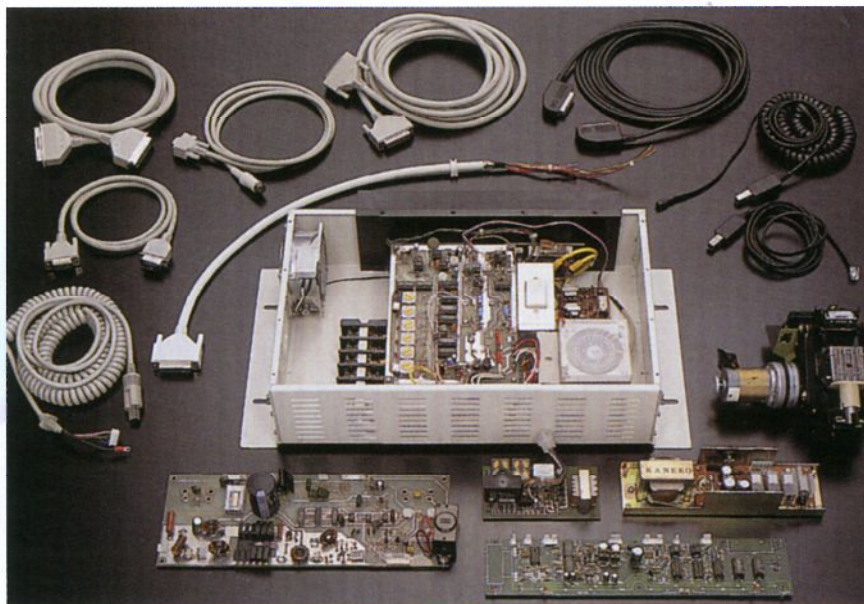

Development of highly value-added devices where our unique know-how is fully utilized

As for moving into the electronics appliance field, we have been expanding the type of operation to the assembly field to apply our accumulated technologies in both metals and plastics and utilize their characteristics.

We also entered the fields of computer-related appliances and medical, health, and beauty appliances, among which the design and

manufacture of OEM (Original Equipment Manufacturing) products to which know-how of our electric and electronics technologies are featured is now our strongest field.

Improvement in our combined strength also leads to further enhancement of user satisfaction, assuring the impressive trust of our customers.
