今や、一般家庭から企業オフィスまであらゆるところで見られる、カーテンやブラインドなどのウィンドウ・インテリア類では、国内の建物の2棟に1棟は、当社の製品が使用されています。

**Specialist in metal processing,
challenging the expanding technical
needs of society**

The company, which grew as a press machine manufacturer from the marketing of machinery parts and tools, will accept the challenge of developing further sophisticated technological innovations by proactively introducing

state-of-the-art technologies in response to the needs of the times; we will not be satisfied with the status quo and past achievements.

Our products are used, in one building out of two in Japan, for window interiors, including

curtains and blinds, which are now commonly used in residential households and business offices.
